 Sorgente

 Piezometrica profonda

 COMPLESSO LACUSTRE - ALLUVIONALE, permeabilità bassa

 COMPESSO ARENACEO PELITICO, permeabilità media

 COMPESSO ELUVIALE/ABBIOSSO, permeabilità media

 COMPESSO CONGLOMERATICO - DETRITICO, permeabilità alta

 COMPESSO DOLOMITICO, permeabilità alta

 COMPLESSO CALCARENITICO, permeabilità alta

The main map is a detailed hydrogeological study of the Polla area. It features a complex network of contour lines indicating elevation, with values ranging from approximately 410 to 460 meters. The map is divided into several colored zones representing different geological complexes: a large brown area (alluvial/lacustrine) in the center and right, a purple area (arenaceous/pelitic) in the upper right, a light blue area (eluvial/sandy) in the upper left, a red area (conglomeratic/detrital) in the upper right, a green area (dolomitic) in the upper left, and a dark blue area (calcareous) in the lower left. A prominent blue line, representing the deep piezometric line, winds across the map, generally following the topography but showing significant fluctuations. Various locations are labeled, including Costa Cucchiara, Codone, Masseria Caggiano, Masseria Medici, Masseria Pica, and others. A north arrow is located in the bottom left corner, and a scale bar (0 to 1,000 Metri) is in the bottom right corner.
